

## **SWM DATA TABLES TO BE ADDED TO CONSTRUCTION DRAWINGS**

|                                                                       |
|-----------------------------------------------------------------------|
| <b>SWM Practice Table</b>                                             |
|                                                                       |
| Facility Name and/or Number<br>(from approved construction drawings): |
| Drainage Area to Facility (acres):                                    |
| Drainage Area Number (as identified on drawings):                     |
| Post RCN: (if applicable)                                             |
| Post Tc: (if applicable)                                              |
| Pe Required:                                                          |
| Pe Addressed:                                                         |
| Impervious Area Treated (Square Feet and/or Acres):                   |
| Storage (Cubic Feet and/or Acre Feet):                                |
|                                                                       |
|                                                                       |

\*Provide individual BMP and drainage area footprints for each practice

|                                                     |
|-----------------------------------------------------|
| <b>SWM Summary Table</b>                            |
|                                                     |
| Drainage Area Number (as identified on drawings):   |
| Post RCN (if applicable):                           |
| Post TC (if applicable):                            |
| Pe Required:                                        |
| Pe Addressed:                                       |
| Impervious Area Treated (Square Feet and/or Acres): |
| Storage (Cubic Feet and/or Acre Feet):              |
|                                                     |

\*For multiple facilities draining to the same outflow (i.e. numerous micro ESDs or a series of infiltration trenches), provide a summary of all facilities within the larger drainage area footprint.
