Annual Water Quality Reports Now Available

Frederick County is pleased to share water quality information . . .

FREDERICK, MD – Consumer Confidence Reports for calendar year 2018 are now available at www.FrederickCountyMD.gov/WaterQualityReports, according to the Frederick County Division of Utilities and Solid Waste Management (DUSWM).

“This annual report provides information about the sources of drinking water and the results of our laboratory testing. Our staff closely monitors water quality to efficiently operate our treatment facilities and also ensure the drinking water they provide meets all state and federal drinking water requirements,” commented DUSWM Director Kevin Demosky. “We hope everyone takes the time to read through this report and recognize the efforts that go into providing safe and reliable drinking water to our customers.”

The Consumer Confidence Report, or CCR, is an annual water quality report that the Safe Drinking Water Act requires all community water systems to provide to its customers. Among other things, the report lists the regulated contaminants found in drinking water, as well as health effects information related to violations of the drinking water standards.

DUSWM shares water quality information annually with its customers from all 13 county water systems.

From April through June, water customers will see a special notice printed on their quarterly billing statement, which will include a direct Web link to their water system’s CCR on the Frederick County Government webpage.

Customers who are unable to view this report online can contact DUSWM at 301-600-1825 to request a paper copy, which will be mailed to them.

For further information or with questions about the content of the CCR, contact DUSWM’s Regulatory Compliance Department Head Terri Snyder-Kolovich at 301-600-2945 or via e-mail at tkolovich@FrederickCountyMD.gov.
