File Format: All files are tab separated text files with no text-delimiter. This format is easily imported into Microsoft products; however, countywide data files are often **too large to read in Excel or Access.**

File Details:

Newly Registered Voters List: Text file containing new voters who registered since January 1. **These voters are also included in the Registered Voter List.**

Absentee Applicants List: Text file containing a list of voters with absentee ballot **requests** for the given election. It includes voter id, name, residential address, mailing address, absentee ballot address, precinct, district information, state and county registration dates, party, absentee type, absentee request status, and county. Actual absentee VOTERS are on voter history lists.

Early Voting List: Text file listing voters who voted at an early voting location for the specified election. It includes voter ID, name, early voting location, date of voting, party, residential address (in one column), mailing address (in one column), ballot style, precinct, and gender. This information is already on the voter history lists.

Registered Voters List: Text file containing a list of registered voters with name, party, gender, residential address, mailing address, status, state and county registration dates, split and precinct, congressional district, legislative district, councilmanic district, ward, municipal district, and county.

Voting History Included in Registered Voter List: Text file identical to the registered voter list **EXCEPT:** some columns are in a different order, it does not have a column for councilmanic district, and there is a column for each election selected. This list is easy to view when opened in a spreadsheet format, but it gives no data on voting method or date.
