

**Green Homes  
Program**

# GREEN HOMES PROGRAM

## OUR MISSION

The Green Home Program's goal is to help ALL Frederick County residents live a more sustainable life! We work hard to expand access to and awareness of resources provided by local government and community organizations.

**GREEN  
COMPASS**

## HOW DOES IT WORK?

The Green Homes Program has three main components:

**The Green Compass Program** provides Community Navigators to help you find and benefit from federal, state, and local programs that can improve your home environment, lower energy costs, and live more sustainably. Let us help you go green!

**The Green Homes Challenge** gives information and incentives to help your household make environmentally friendly choices. You can connect with others in a great, green community, apply what you learn to earn points, and receive recognition for your efforts!

**Green Partnerships** offer individuals, community organizations, and businesses opportunities to collaborate with us to better reach underserved residents. Working together we can offer support for sustainability projects, training for sustainability practices, and improved access to resources. Let's ensure that no one gets left behind as Frederick builds a resilient, thriving, green future!
